

## Suite Camping Tent

### 14'W x 20'L x 5'H - Tent

Montana Canvas uses the highest grade 'A' polyester/cotton blended fabric available in the luxury camping market today. The fabric meets all the California Fire Marshall CPAI-84 specifications, is mildew, water and flame retardant, remains strong and flexible in cold weather, cleans up easily and is incredibly strong to withstand years of use.

#### **This Suite 14'W x 20'L tent features:**

- 5' straight side walls, peak height measures 10'.
- Inverted 'T' style zippered front door with weather flap and separate Phifertex screen door.
- Six 24"H x 30"W zippered Phifertex screened windows, two in each side wall and 2 in the back wall.
- The base of tent features a webbing reinforcement with grommets. This allows for the use of stakes to be set inside or outside the tent or to easily attach to a more permanent platform.
- 4" vinyl sod cloth around the base of the tent to help create a weathertight seal.
- 200' of ¼" polyester rope, rope tension adjusters and a newly designed zippered tent storage bag.
- Each tent is constructed of double stitched poly/cotton double layered end wall seams and double stitched eaves. The roof and top gable ends feature additional reinforcement to accommodate a full-length ridge pole if you choose to construct your own frame from lodgepole pines or other materials.
- The tent is designed to easily accommodate a Queen size bed, several twin beds, or various other sleeping arrangements to sleep up to 6 people comfortable.

#### **Frame –**

Heavy duty aluminum frame is designed to drastically reduce the set-up time. Constructed of a 1.375" diameter aluminum alloy main frame with 1" steel conduit reinforcements. The cast aluminum frame joints feature a patented adjustable hinge system that comes preset to fit the 14'x 20' Suite model tent. Designed with a 5 rafter/leg internal system to provide maximum structural stability. Complete package features a 6 rafter frame with the 5' porch extension to support the fly. Frame bag included.

#### **Fly –**

Designed to cover the entire tent with a front porch area. The fly will cover the entire tent and extend 5' off the front to cover the porch area. Constructed of heavy-duty Fire-Retardant PVC vinyl.
