

OUR STORY

Born in a one-machine upholstery shop in the Gallatin Valley, Montana Canvas began in 1982 when the Schaefer family turned their eye for rugged craftsmanship into a company sewing truck-tarps and, soon after, canvas wall tents. Word-of-mouth demand carried their tents from local elk camps to outfitters across North America, laying the foundation for four decades of growth.

Today, our 23,000 sq ft manufacturing and retail facility in Belgrade, Montana, houses nearly 30 long-tenured craftsmen and women. Many with 15-plus years at the sewing table, who meticulously sew every seam, inspect every stitch, and stand behind every order the way only a small-town crew can.

We insist on top grade-A canvas, reinforced corner brackets, and an industry-leading wax finish that is proven against the harshest Montana weather. Every tent carries the promise of friendly, knowledgeable service whenever you call or stop by.

Our Promise to you

Established in 1982, Montana Canvas has continued to evolve and adapt throughout the years. Since the beginning, we have taken pride in our work and manufacturing the best products on the market. Our technique and craft has improved over the years, but the heart behind what we do is the same as it was over 40 years ago. Each tent is built in Belgrade, Montana by a team of people who love the outdoors. We stand behind our commitment to quality, and we are proud of our legendary customer service.

WALL TENTS

Limited Lifetime Warranty

Products manufactured by Montana Canvas are warranted against defects of materials and workmanship. Any product found defective will be repaired or replaced (at the discretion of Montana Canvas) without charge when the product is returned to the retail seller with freight charges prepaid.

This warranty is voided with the use of cleaning or treatment agents or compounds that have not been approved by Montana Canvas. This warranty does not cover torn fabric or merchandise damaged through misuse, accident, or transportation. The manufacturer makes no other warranty either express or implied and shall not be liable for consequential or incidental damages.

This warranty applies only to new products sold at retail value and to the original purchaser. This warranty gives you specific legal rights. You may have other rights which vary from state to state.

WALL TENT STANDARD FEATURES

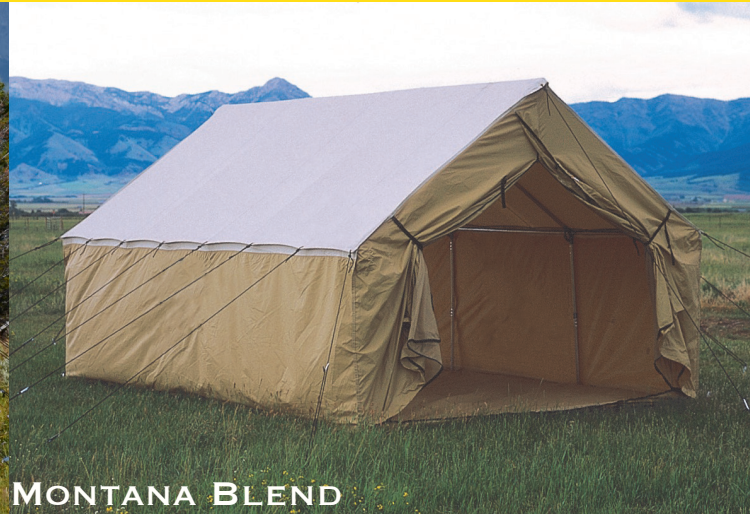

All of our standard, non-customized tents come with the following:

- A 5" stove jack with a weather flap inside the front door to the left.
- One 24" x30" no-see-um mesh screened window on the backwall, It can be completely closed from the inside of your tent.
- Standard sidewalls at 5' tall.
- A 7' 6" zipper door with a buckled weather flap.
- A 12" sod cloth around the base of your tent designed to provide a weather-tight seal.
- A 200' hank of black polyester rope for all of your guy lines, the necessary tension adjusters, and 12" steel stakes.
- A zippered storage bag made of a heavy-duty polyester designed to keep your tent and all its pieces together.
- Each of our tents are built with various reinforcements along the body and ends. These allow for years of heavy use.
- The ground seam around the bottom of our tents is reinforced with webbing and contains heavy duty grommets for your stakes.

10 OZ. TRADITIONAL

MONTANA BLEND

12 OZ. PREMIUM

Each tent is 100% manufactured in the USA and is constructed of six layers of double stitched canvas, double layered endwall seams, and double stitched eaves. The roof and top gable ends feature additional reinforcement to accommodate a full-length ridge pole if you choose to construct your own frame from lodgepole pines or other materials. Base of the tent wall features a webbing reinforcement surrounding the perimeter of the tent including grommets. This allows stakes to be set inside or outside the tent for additional stability. Frames are sold separately. Stakes are sold separately. Made in USA.

10 oz Traditional Canvas

The Wall Tent, also referred to as a cabin tent, has a history and legacy as old as the country. It provides shelter from the most severe elements. Montana Canvas uses only grade-A, 10 oz. cotton duck treated canvas. The canvas is treated in the USA and provides maximum protection from the elements and includes additional mold and mildew inhibitors to protect the natural canvas. The canvas is fire-retardant meeting the California Fire Marshall specifications.

12 oz. Premium Canvas

Our premium 12oz canvas is for those who want to go further and stay longer. The most significant difference between our 10oz and 12oz canvas is the weight. Boasting the same rigorous treatment, grade-A quality, and integrity, the 12oz offers slightly better results in terms of insulation and durability. While most tents we sell are 10oz, we recommend the 12oz premium for longer term and winter utilization.

Montana Blend

For outfitters, aviators, and those concerned about weight, this is your solution. This unique material combination is constructed of our traditional 10oz canvas for the roof, with the sidewalls and end walls built from our lighter weight Relite RS polyester material. The Montana Blend weighs about 40% less than our 10 oz canvas tents without sacrificing any quality.

FRAMES

Montana Canvas frames can be used with a tent you already own, or order them by size to perfectly fit our Montana Canvas tents. Our frame design drastically reduces the set-up time and enables one person to do the job alone. Constructed of a 1.375" diameter aluminum alloy main frame, reinforced with 1" steel conduit. The aluminum is extruded to be of a consistent .065" thickness. The cast aluminum frame joints feature a patented adjustable hinge system that allows you to fit the contours of not only a Montana Canvas tent, but can be adjusted to fit any model wall tent.

Pack Frames

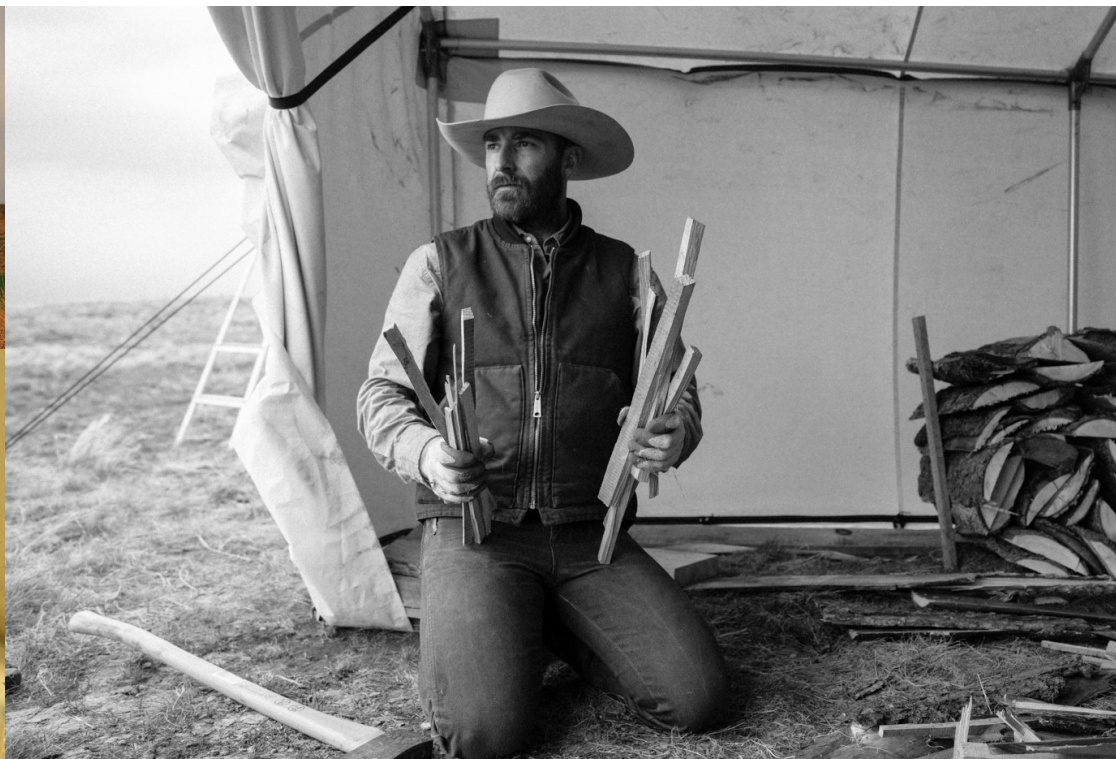

If you prefer shorter frame sections for packing and freight reasons, this might be the frame for you. Our pack frames allow for the longest frame section to be 30" long. However, this does add to the overall assembly and weight.

Joints

Our patented cast aluminum frame joints offer an adjustable hinge system making each joint identical across your eaves and ridges. Recently updated with color-coded pins to reduce setup time and head-scratching, you will easily be able to tell your ridge pieces apart from eaves on every frame.

DIY frame joint kit

Our DIY Frame kits include the necessary components to build your own frame including joints, accessories, and aluminum sleeves. You buy the conduit. Select between a 9-Joint or 12-Joint kit for a three or four rafter frame.

Spike III Tent

- 12' x 12' with 4' sidewalls.
- Constructed of our proprietary Relite RS polyester.
- 5" stove jack with a weather flap located inside your tent to the right.

- 100% waterproof roll top dry bag for maximum protection.
- Lightweight 9" aluminum tent stakes 1/4" reflective black guy lines with aluminum tension adjusters
- Built in 5" oval stove jack with flap 9' Aluminum center pole.
- Loop on peak for hanging tent rather than utilizing center pole.
- Weights: with floor 16 lbs, without-floor 11 lbs, center pole: 3.8 lbs, stakes: 8oz.
- Made in U.S.A.

For years, Montana Canvas has been known for building tough, dependable wall tents that stand up to every season. Now, we are bringing that same commitment to quality in a lighter, more versatile design. The new 12' x 12' Hyalite Tent delivers generous space in an octagonal shape. This complete lightweight package is perfect for Backcountry hunters, weekend campers, casual adventurers, and anyone looking for an easier setup without sacrificing comfort. Made entirely from durable Relite RS fabric and finished with an optional fully sewn-in floor, it offers protection and convenience wherever you set up camp. With its single center pole design and built-in ventilation, this tent is simple, spacious, and ready when you are.

TENT ACCESORIES

Flys

Montana Canvas tent flies are designed to fit perfectly over the top of your tent. Fly extends 18" off either side of your tent to provide maximum protection from the elements. Tent fly is constructed of our Relite RS 250D polyester material in tan color. Fly has grommets at the edge of the fly to easily attach guy lines and secure it properly.

Floors

The tent floor will help keep moisture out and the dust at bay. Made out of 10 oz. laminated vinyl with 5' x 5' cutout for stove placement and banded around edges with eyelets for securing to the ground.

Pole Hanger

Our pinch-and-set pole hanger is a very versatile accessory that can be used with any section of frame we make to hang lanterns, packs, clothing, bags etc.

Gun rack

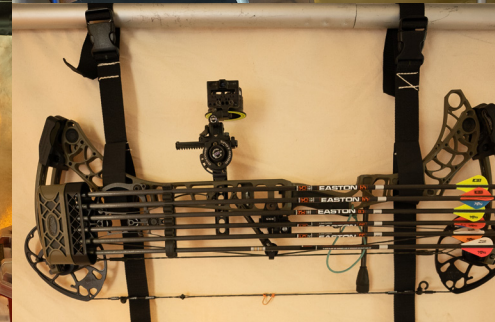

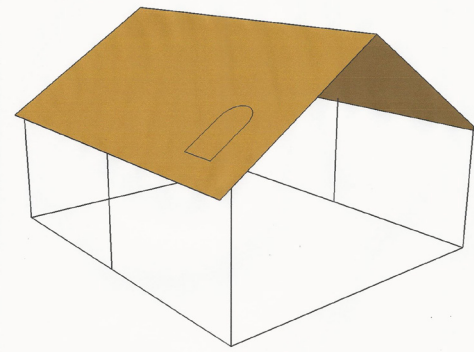

Easily attaches to two of the frame joints on the inside of your wall tent and keeps guns upright and out of the way. Simple design allows for easy access and security. Holds up to six long guns.

Fire Mat

Protect the dry ground or tent wall behind the stove with our Montana Canvas fireproof mat. Made from silver fire/spark proof material, it measures 5' x 4' with grommets in each corner and 5 grommets along one edge for hanging.

Bow Rack

Designed to allow you to hang up to three compound or traditional bows. This rack fastens to your internal tent frame and has Velcro loops to keep your gear safe and off the ground.

OUTFITTER SUPPLY

PACK PANNIERS

- Fits Sawbuck or Decker pack saddles.
- Width - 29" Height - 18" Depth - 14"
- Sold as a pair.

SADDLE PANNIERS

- Fits majority of riding saddles and sizes.
- Width - 24" Height - 18" Depth - 14"
- Rolls up small and fits tied down behind cante.

Made of a heavy-duty, vinyl-coated polyester and reinforced at stress points for strength, durability, and easy maintenance. Buckled boxed lids are standard. Drainage grommets permit easy, garden hose-style clean up. D-rings provided to accommodate a variety of packing methods. Made in U.S.A.

Game Bags

Made in the USA and constructed of our heavy duty 10oz. untreated, grade-A canvas, the breathable fabric is designed to promote cooling and protect meat from insects, dirt, and harsh weather conditions. 29" wide x 44" deep. Made in U.S.A.

Manti Tarps

Used to pack gear in tight bundles on either side of your animal. They help protect your gear from trees, weather, and stock. Each Manti Tarp is built at 7' x 8' in our 15oz. untreated canvas with a grommet in each corner. Made in U.S.A.

Outfitter Bedroll

Stay warm with our traditional western-style bedroll. Our bedrolls are built out of 15oz. untreated canvas with an overall size of 46" wide and 96" long, and a sleeping area of 45" wide and 80" long. Constructed with a zipper down each side to support left or right-handed sleeping bag. This is our most popular accessory and always makes your stay more comfortable. Sleeping bag not included. Made in U.S.A.

TARPS

Montana Canvas is well known for our construction of tents and accessories, but we have just as much expertise when it comes to building tarps, such as general-use utility tarps, truck tarps, and lumber covers. Putting our welding and vinyl sewing skills to action. We also build many customized covers for boats, trailers, and other equipment. All made in U.S.A.

Custom Tent Flys and Tarps

With all our knowledge from years of building tarps and tents, we also have plenty of expertise creating custom tent awnings, tent flies, and extended porches. All you have to do is provide us with the dimensions and specifications on your project, and we will do all the dirty work.

Box Covers

Montana Canvas has the ability to custom build pretty much any cover you can imagine. Just provide us with the dimensions and specifications of your project, and we will offer up fabric suggestions, ideas, and an affordable price quote.

Truck Tarps

Since the earliest days of Montana Canvas we have been making truck tarps withstanding the test of time. Anything from steel, lumber, rollover, and shur-lok tarps, to honey bee and tree nursery tarps, we have you covered. We have a variety of hardware options to make sure your tarp does what you need it to. Just give us a call and find out what we can do for you!

Boat Covers

Montana Canvas boat covers are some of the best in the business, however we require the boat and trailer to be with us during construction. We can do all sorts of fishing boats, drift boats, rafts, and more! Just give us a call and let us determine what we can do for you!

Industrial Tarps

Constructed of heavy-duty Shelter Rite vinyl, an 18oz. polyester-based fabric with surprising strength, these are not your typical disposable tarps. Shelter Rite is a Seaman brand fabric, woven and coated in the USA. With reinforced welded steel 'D' rings, these tarps can be easily used for all applications.

GLAMPING

PACKAGE C

Adventure in style with one of our custom glamping tents

Beautifully crafted from our proprietary, polyester-cotton blend, these tents are all customized, but share the amazing strength of this fire-retardant, resilient fabric. Each tent is manufactured in the USA and includes ample stitching and webbing reinforcement along with a frame that provides unrivaled structural integrity. Creating your dream getaway to set up on a platform in the trees, overlooking a lake, or in your own backyard, is as simple as choosing a size that fits your needs. We build tents from 8' x 10' to 18' x 23' and our most popular sizes are 12' x 14' which fits a one-room furniture setup nicely, or 14' x 20' which allows for multiple sleeping options.

LUXURY MODEL

Our luxury model tent is a 12' W x 14' L with 5' sidewalls, a screen door and three windows. One standard window(30" W x 24" H) on each sidewall and a large window(48" W x 30" H) on the backwall. This is the perfect setup for a queen-size bed or two twin-size beds.

SUITE MODEL

The suite model tent is 14' W x 20' L with 5' sidewalls, a screen door, and six standard windows (30" W x 24" H). The model is perfect for larger groups, or additional furniture and amenities.

Glamping tent features:

- Side walls are 5' tall.
- A 7' 6" front door with high-quality zippers and an option for a front screen door.
- Window options are available, ranging from a standard 24" tall x 30" wide to the even larger 30" tall x 48" wide.
- Tent bottom reinforced with webbing, including grommets that allow you to stake your tent from the inside or outside.
- Sod cloth that is sewn onto the tent bottom with ample room to provide a weather-tight seal.
- 200' of black poly rope, 20 triangular rope tension adjusters, 12" steel tent stakes, and tent storage bag.
- Full-length ridge pole reinforcement with additional reinforcement at the gable ends.
- Eaves constructed of a double layer of canvas, double stitched.
- End wall seams using six layers of double lock-stitched canvas.
- Each window offers no-see-um mesh and can be closed completely from inside the tent.
